

THE MOBILITY HOUSE

Requirements Engineer / Product Owner Internship / Working student

Location: Munich

Managing innovative software for an emission-free future sounds like a mission made for you? Join our technology team and help us to revolutionize the energy markets with electric vehicle batteries.

WHAT YOU WILL DO

- You collaborate with the product development team, developers and designer in order to deliver our software in terms of quality, time and budget.
- You contribute to manage and prioritize new features for the next releases.
- You gather and write user stories.
- You define acceptance criteria and conduct acceptance tests.
- You contribute to the continuous improvement of our agile processes.

WHAT YOU BRING TO US

- You have a university degree or you are still studying in any engineering or IT discipline (e.g. Computer Science, Electrical Engineering, Physics, Mathematics, Systems Engineering or an equivalent field of studies).
- You are interested in the energy field.
- You are willing to learn and you would like to join a challenging environment.
- You are fluent in English.

WHAT YOU CAN EXPECT FROM US

- You have the opportunity to take on important tasks as part of a highly motivated team.
- We are a young, dynamic and multicultural team. We highly appreciate new faces and ideas.
- We love to celebrate! Join our BBQs on our roof terrace and other activities.

READY TO JOIN US? APPLY NOW!
