

'No more dirty hands'

EV Cable Hook[®]

The EV Cable hook is for every vehicle with a plug connection: the perfect hook to keep your power cord neatly stowed away.

Everybody driving an electric vehicle has the same problem: whilst uploading your car, the power cord lies on the ground and when tidying up afterwards, your hands and, possibly your clothes get dirty! Thanks to the EV Cable Hook, this is a thing of the past!

The EV Cable Hook is simple to use and serves its purpose by keeping everything clean whilst uploading your car and is especially easy to store. The hassles of entwined and dirty cables are no longer an issue!

1 Plug in

2 Roll out

3 Plug in and place the cable over the hook

4 Clean cables

EV Cable Hook:

- Universal and fits most cables
- Dutch invention and produced in the Netherlands
- Available in various colours and with own print/logo
