# eCharge+ General

## Quick Walkthrough

Never miss a charging station.  
Next to the map view, the intelligent **list view** shows nearby charging stations.

State of charging points easy to detect through **intuitive map pins**.

Unique QR-Code and **charging point number scanner**.

The search function **helps you to plan your trips** and drive to specific charging points.

Use the **filter function** to see only relevant charging stations.

In the **"profile menu"** you can check your charging history, add payment methods and get support.

Tabbar provides **quick navigation** through app.

# eCharge+ Public Charging

1

- Find charging stations near you or at a specific address.
- Filter the map according to the charging stations relevant to you.
- Use map or list view.

2

- Check the **availability** of charging points in **real time**.
- Get **comprehensive information** about charging station.
- See the **best price** based on the configured payment method.

3

- Add your **preferred payment method** once and start charging even faster in the future.
- Pay conveniently** with PayPal, credit card, giropay (paydirekt) or your charging contract directly via the app.

4

- Never miss the charging costs**, all price modules are transparent and shown before the charging process.
- Always keep an eye on **active charging processes** and track the **charging history**.

# eCharge+ Contract Handling

- 

Open the “**profile menu**” located right in the Tabbar.
- 

Select “**Add payment method**” at the top if none is defined yet.

Further payment methods can be defined in the settings.
- 

Choose “**Autostrom Vertrag**” and continue.

Proceed the same way if you wish to define another payment method.
- 

Fill in your Contract ID (EMAID) or your email address and complete the setup by entering your **password**.
- 

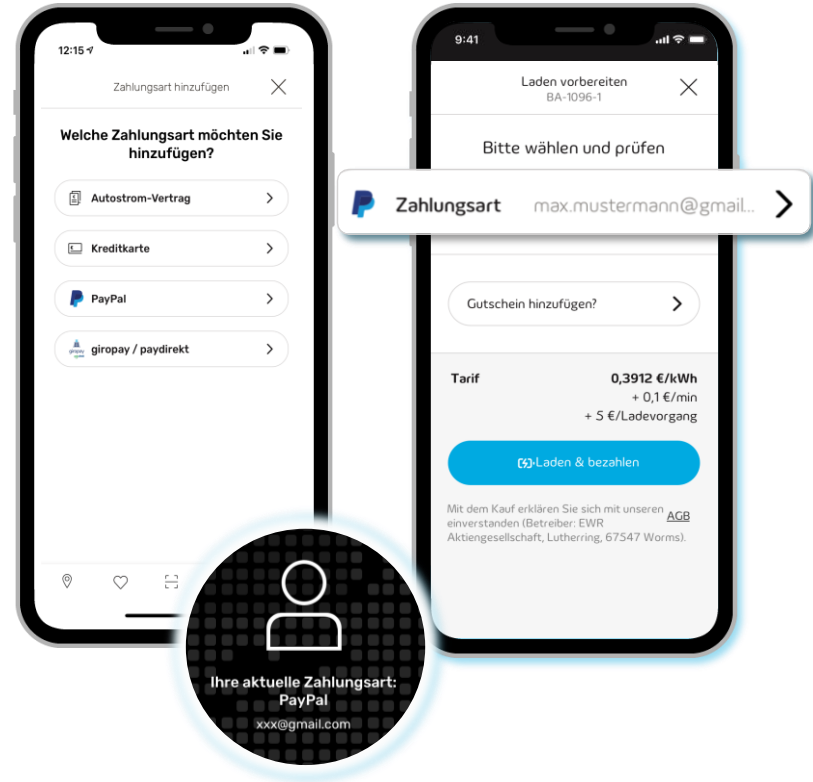

**Charging sessions** can now be **activated** via your contract.

The app is automatically transferred to the **design of your provider**.

# eCharge+ Direct Payment

- 1 Use the "profile menu" item to configure your payment method.
- 2 Select "Add payment method" to configure a new payment method.
- 3 Credit Card, PayPal and giropay (paydirekt) are available for Direct Payment.

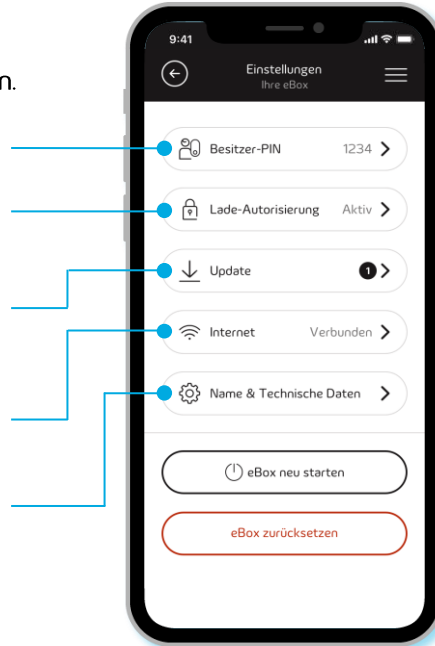

- 4 Enter your **payment information** and store your **billing address** for charging directly in the app.
- 5 In the "prepare charging" step, select your type of payment.
- 6 The price is displayed at the charging station details if Direct Payment is supported at the respective charging point.

# eCharge+

## Home Charging

- 1 Open the menu and select "Home charging" to start the configuration.
- 2 Define a pin to unlock the eBox touch.
- 3 Protect your eBox from being used by unauthorized users.
- 4 You will be notified when **software updates** are **available** – easy installation via the app.
- 5 Change the **internet connection** (WiFi or LAN).
- 6 Get **all necessary information** about your eBox when you need it.

### Highlights:

- ✓ **Always connected:** As the owner or co-user of a private charging box (eBox smart, eBox professional or eBox touch) you can link your eBox to the eCharge+ app.
- ✓ **Easy configuration:** Configure and manage your charging box conveniently from your living room via an internet connection.
- ✓ **Close monitoring:** Benefit from further development of intelligent functions that automate your eBox control more closely.
- ✓ **Customized:** Adapt it to your personal needs.
