

HW/SW Integration / Electrical Engineer

Fulltime | Sunnyvale (California)

Responsibilities

- You design, build and maintain test and demonstration EV charging setups
- You lead the integration of new hardware (EV chargers) with our software platform
- You keep track of the system and resolve issues and bugs
- You define work packages and manage the collaboration with contractors
- You perform quantitative analysis on fleet and energy data
- A little bit of everything – we are a startup!

Who you are

- You're a strong team player with a can-do attitude and passion for electric mobility; we are a very mission-driven company that wants to enable an emission-free future
- You have gained hands-on experience with installing, testing, troubleshooting and maintaining of new hardware and software
- Bonus points (not a requirement) for certified electricians, as well as automotive or energy industry experience

What we offer

- Good times – we love what we do, work hard, and have fun along the way
- Lots of autonomy and responsibility – you can significantly shape a new venture
- Open feedback culture – we want to grow as people and help each other to do so
- Learning opportunity – this is a young industry and every day you'll gain new knowledge and skills
