

THE MOBILITY HOUSE

Senior Software Engineer

Fulltime | Austin

Responsibilities

- You design SW architectures, develop and test software for our energy storage solutions that enable the integration of electric vehicles into the power grid
- You maintain internal "Open Source" code repositories
- You contribute to the continuous improvement of our software development technologies, tools and processes to ensure highest quality in our products
- You collaborate to define and implement customer-driven features in a well thought out and robust manner
- You mentor other team members to improve their knowledge and skillset

Who you are

- You have a university degree in Computer Science, Electrical Engineering, Physics, Mathematics or an equivalent field of studies
- You have 5 years or more experience in developing high quality software in Python or JavaScript (Node.js backend)
- You have a decent knowledge of the Linux Operating System
- You use Continuous Integration and Continuous Deployment tools
- You are a team player who values learning and shipping quality solutions to customers

What we offer

- We value an open company culture and encourage each other to participate to the fullest
- We are a fun and down-to-earth group with talented colleagues from all over the world
- We invest in you and help you develop your skills, e.g. through offering competitive compensation and external training programs
- We support learning in this young industry and every day you'll gain new knowledge and skills
