Technical Product Owner

Fulltime | Austin

Responsibilities

- You collaborate with the developer team, internal/external customers in order to deliver our solution in terms of quality and time
- You contribute to manage and prioritize new features for the next releases
- You gather and write user stories, you define acceptance criteria and conduct acceptance tests
- You contribute to the continuous improvement of our agile processes

Who you are

- You have a university degree in any engineering or IT discipline, e.g. Computer Science, Electrical Engineering, Physics, Mathematics, Systems Engineering or an equivalent field of studies
- You have a deep understanding and appreciation for agile (scrum) processes
- You have a good knowledge of electricity markets
- You face new tasks with a strong sense of responsibility and you like to join a challenging environment

What we offer

- We value an open company culture and encourage each other to participate to the fullest
- We are a young, dynamic and multicultural team. We highly appreciate new faces and ideas
- We value fair working hours and performance-related pay
- We invest in you and help you develop your skills, e.g. through external training programs
- We support learning in this young industry and every day you'll gain new knowledge and skills
